

4ft - 12ft Fishing Cast Net Double Knot Easy Throw Cast Net

Our Product Introduction

Basic Information

- Place of Origin: Shandong, China
- Brand Name: Sunrise
- Certification: ISO
- Model Number: 4457
- Minimum Order Quantity: 500 Pieces
- Price: 25 USD/Piece for 12FT
- Packaging Details: Negotiated / Standard Package
- Delivery Time: Negotiated / 20 Working Days After Payment
- Payment Terms: T/T
- Supply Ability: 80000 Pieces/Month

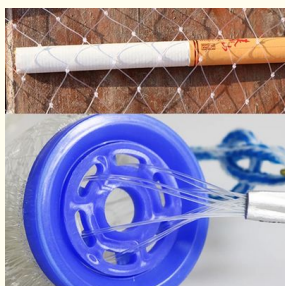

Product Specification

- Product Name: Fishnet (Fishing Net)
- Size: 4ft/5ft/6ft/7ft/8ft/9ft/10ft/11ft/12ft
- Sinker: Steel Sinker
- OEM: Available
- Knot Type: Double
- Type: CAST NET
- Highlight: 12ft Fishing Cast Net,
4ft Fishing Cast Net Double Knot,
12ft Easy Throw Cast Net

Product Description

Japanese Style Cast Net Throw Catch Drawstring Lines Fishing Net

A cast net with a throw, catch, and drawstring lines is a versatile fishing tool used to catch baitfish and other small aquatic creatures. This type of net is typically used by anglers, especially inshore and nearshore fishermen, to catch live bait for fishing. Here's a breakdown of its components and how it's used:

Cast Net: The primary component is the cast net itself. It's a circular net with weights attached around the outer edge. The weights are evenly distributed to help the net sink quickly when thrown into the water.

Throw Line: A throw line is a long rope or cord attached to the center of the cast net. The angler holds onto the throw line when throwing the net into the water. It allows the angler to control the direction and spread of the net.

Catch Lines: Catch lines are typically shorter cords or ropes attached to the periphery of the net. These lines are used to gather the net once it has sunk and captured the desired baitfish. Each catch line corresponds to a section of the net and is pulled to bring the net together.

Drawstring or Pull Line: This is a line that is attached to the center of the net, usually through a series of loops in the net material. The drawstring is pulled to close the net after it's been thrown and bait has been captured. This action forms a pouch to secure the catch.

Product Description

Product Type	Fishing Nets
Type	CAST NET
Knot Type	Double
Length	4ft-12ft
Place of Origin	China
Brand Name	CUSTOMISED
Model Number	Net08
Sinker	Steel Sinker
Color	As the picture
OEM	Available
Sample	Sample Available

How to Use a Cast Net with Throw, Catch, and Drawstring Lines:

Open the Net: Hold the throw line in one hand and the net in the other. With a circular motion, cast the net outward, allowing it to spread open in the water.

Sink the Net: The weights on the net's edge will cause it to sink, trapping baitfish beneath it. Wait for a few seconds to allow the net to sink and capture the bait.

Gather the Catch Lines: Once the net has sunk and captured the bait, use the catch lines to pull the net together. Each catch line is pulled, and the net gathers into a pouch, trapping the bait inside.

Close the Net: Finally, pull the drawstring or pull line in the center of the net to secure the bait and close the net.

Retrieve the Net: Pull in the throw line to bring the net and captured bait back to the angler.

Cast nets with throw, catch, and drawstring lines are a practical and effective way to catch live bait for fishing. They come in various sizes, so anglers can select the appropriate net size based on the type of baitfish they are targeting and their fishing needs. It's important to practice using a cast net properly to avoid tangling and ensure the safety of the baitfish. Additionally, familiarize yourself with local fishing regulations related to the use of cast nets.
